

License Plate Readers

In response to the increase in crime, and after several years of discussion at monthly board meetings, the Metro District 3 board approved the installation of license plate reading cameras at all entrances/exits to Murphy Creek.

Use of these cameras in other neighborhoods has shown that the capture of time-stamped license plates can assist law enforcement in their investigation of crime and apprehension of criminals.

The cameras were first recommended by Metropolitan District Public Safety, the security company for Murphy Creek, and they backed up their recommendation by agreeing to share the cost of the cameras with the District.
